

ORIENT PACIFIC ACCEPTED AS MEMBER OF THE CHINA COOPERATION NETWORK OF ASME CODE ITEMS (CACI)

BEIJING, China - Orient Pacific, Ltd. has been accepted as a member of the China Cooperation Network of ASME Code Items (CACI).

CACI was established in 1994 and is a branch of China Petroleum & Petrochemical Equipment Industry Association (CPEIA), with independent business and finance arrangements. CACI also operates as the ASME Code Product Committee of CPEIA inside China. CACI is registered in State Ministry of Civil Affairs and operates as a non-profit organization. CACI now has 224 members, including manufacturing enterprises, design and research institutes, consultants and inspection agents, all of them using the ASME Code in their business. As of this writing, 80 of 224 CACI members are ASME stamp holders.

Amongst other aims and objectives, CACI is organized to:

- Provide technical consultants for relative enterprises and institutions.
- Organize seminars and training for ASME Code applications.
- Arranging foreign experts to present Code related seminars or exchange activities.
- Provide open exchanges between foreign and Chinese engineering enterprises.
- Conduct quarterly publishing of "ASME in China"

Orient Pacific, Ltd. is a wholly foreign-owned enterprise of the Orient Group, Ltd., and is fully and properly licensed to transact business from its' China offices.

From headquarters in the Shanghai Pudong central business district, Orient Pacific brings an abundance of knowledge, experience and expertise in engineering, manufacturing, welding, construction, erection and commissioning of pressure equipment/piping.

Orient Pacific's staff and engineers possess a matchless knowledge and application awareness of statutory and jurisdictional requirements to Western and Asian laws, statutes, regulations and codes.

Orient Pacific's comprehensive engineering and consulting services are offered to a basket of global regulations, codes and standards, including these and others:

- ASME (N. America)
- AQSIQ (China)
- P.E.D. (European Union)
- CBB (India)
- MoM (Singapore)

Local contacts, and experience working with Chinese Provincial and National regulatory bodies, give Orient Pacific a distinctive advantage when representing foreign suppliers of equipment to China.

Managing Director, Mr. Todd Fleckenstein states that amongst other benefits, "the association with CACI adds one more critical component to our total-service strategy."

Contact Orient Pacific to work as your local agent for all licensing, design and approval applications and other commercial and technical matters or issues related to equipment in, or bound for, China.
